

Maine Farmer.

Augusta, July 11, 1874.

TERMS OF THE MAINE FARMER.

\$2.00 in advance, or \$2.50 if not paid within three months of the date of subscription.

All payments made by subscribers will be credited on the yellow slip attached to their papers. The printed date in connection with the subscriber's name will show the time to which he has paid, and will constitute, in all cases, a valid receipt for money sent by him.

Any subscriber desiring to change the post office address of his paper must communicate to the name of the office to which he has previously sent, otherwise we shall be unable to comply with his request.

Collectors' Notices.

Mr. J. P. CARR will call upon any subscribers in Penobscot county, during the summer.

Mr. A. GORDON of Solon, will visit subscribers in West Somerset county during the month of July.

Mr. C. S. AYER, will call upon any subscribers in Sagadahoc County, during June and July.

Our Colonial Visitant.

For sometime to come, on every clear night, the eyes of thousands will be turned towards the northern sky to witness the comet which has now become a very conspicuous object. The whole northern heavens have become invested with new interest since the advent of this stranger, and the Great Bear, the Dipper, the Giraffe and even the far off Cassiopeia will be recognized by many who have heretofore given them no thought or attention. For several evenings one of the pointers of the Dipper, the polar star and the comet marked the angles of an equilateral triangle, but this is not the case at the present time, as in its progress the comet curves continually southward to the left. Those who have not seen it will now hardly need any directions for finding it, as when visible, it is now the most conspicuous object between the horizon and the well known fixed stars which we have already enumerated.

This is a new comet, and is generally supposed to be the one observed April 17th, by the French astronomer M. Coggia, at Marseilles. Some American observers contend that the Coggia comet has passed its perihelion and is now retiring, and that this one is another. Astronomers differ considerably about the perihelion (nearest the sun) of this comet, some putting it as early as July 8th, and others as late as July 20th. About the 10th of July it can be seen very distinctly after sunset, with the moon shining above it.

From what depths of space this stranger to whom the eyes of Christendom are nightly turned, came, and whether, after performing his journey around the sun and paying his regards to that great luminary, it will extend its travels, no one knows, but its course while encircling the sun is quite accurately marked out, and it might easily be followed from the earth, will reach no detriment.

This comet a week ago was about equal to a star of the fourth magnitude, and is steadily growing brighter, and in moving in its eccentric orbit it will approach about as near the earth as Venus, but as this well known planet is many millions of miles distant from the earth there need be no fears that the comet will collide with the earth, or even approach so near as to cause any slight meteorological effects, and it is said that for a short period it will impart an atmosphere to the moon which scientists men tell us is destitute of that substance so essential to the existence and support of animal life. The thin, vaporous, gaseous appendage to the comet, which is called the tail, is said to be six or seven millions of miles long, a length entirely disproportionate to the size of the comet in respect to symmetry. In consequence of our limited knowledge of this celestial body we are all the more interested to watch its movements and study its changes, and this interest will continue unabated until its lustre disappears, and a more luminous horizon, it becomes, perhaps, forever from our horizon.

Up to the time of Tycho Brahe, comets were supposed to be mere products of our own atmosphere, but that eminent astronomer demonstrated the fact that they were far beyond the outer limit of the earth's atmosphere and entirely independent of it. Since the invention of the telescope by Galileo the notions of comets as well as of all other heavenly bodies have been studied with comparative ease, and the time may come when, with improved facilities for investigation, we may know the more of these far distant wanderers, and we now watch and contemplate with such intense interest.

Some of the comets travel in the same direction around the sun and reappear once in seven years; others appear at intervals of longer duration and some are never seen but once. Several have appeared regularly for certain periods and then failed to appear again. The comet was between the earth and the sun July 20th, and not until then shall we have settled weather. The old superstition which has prevailed is attributed to the comet, and certainly it is many years since we have had such a cold June and July.

The CENTRAL EXPOSITION BUILDING. Mr. Henry Pratt, engineer of the main hall of the Centennial Exposition Building to be erected at Philadelphia, has presented plans of the main hall to Director-General Goshorn. Mr. Goshorn approved the plans, and telegraphed the fact to the Finance Board at Philadelphia, to enable them to let the contracts immediately.

The building will cover eighteen acres, and resemble in general the plan of the London Crystal Palace, to be constructed of iron and glass, very little wood being used, and will be about twice as large. It is 464 by 1688 feet, and has a nave 120 feet wide, flanked by lateral corridors parallel with it. The corridors are separated from the central nave by broad covered aisles and are flanked on their outer sides by a series of transverse aisles, the same general plan as the building divides it as the centre into two equal parts. The estimated cost of the building is \$1,200,000.

The old question of superior rank has arisen between General Sherman and Secretary Belknap. The general has been ordered back as the last year of the war, and the old veteran refused to recognize a mere clerk as his superior officer. The general has now published documents sustaining his view of the matter, and Secretary Belknap replies that he is merely carrying out the rules and practices in force in the Department when he took charge of it. It is an account of this conflict of authority that the head of the army is to be moved to St. Louis. It will be remembered that General Butler made an effort to have a bill passed giving the army head quarters at Washington, but the measure failed. It is supposed that General Butler favored the position taken by the Secretary of War.

A destructive fire occurred at Allagany city, Penn., on the afternoon of the 4th. About one hundred buildings were consumed, including stores, shops and dwelling houses. The fire was caused by fire makers, and the loss will reach \$300,000.

CITY NEWS AND GOSPEL. The Mansion House in this city, after having undergone thorough repairs, has been reopened to the public under the charge of Col. W. M. Thayer, the former landlord, who has associated with him his son, in the business. Mrs. Augusta J. Hall has assumed the duties of matron to the Insane Hospital. — Llewellyn Cunningham, while aiding in discharging coal at the Insane Hospital, last week, fell from a staging and broke his ribs. — The opium rans will delay the opening of the new theatre, as the opium, who escaped from the Insane Hospital a year ago and who was supposed to be dead, is yet alive and strolling through some part of Massachusetts. — J. L. Stoddard, Esq., Deputy Collector of Internal Revenue, assisted by several sheriffs, recently found near a pond on the road from Cooper's Mills to Somerville, a man and all the reports last week. — The steamer Magnet recently made the trip from Squirrel Island to Gardiner in less than six hours. — A rifle ball entered the house of Bradford Kimball, Esq., on Wednesday night, on Saturday afternoon, breaking the glass, passing through the curtains and striking the finish several feet from where it entered. Marksmen cannot be too careful in firing long range rifles. — The Free Baptist and Universalist churches were profusely decorated with flowers, last Sunday, but the rain prevented a large attendance and some of the exercises were postponed.

— Senator Morrill arriving from Washington much better than it was last week. — John B. Rainard was on a drunken spree last week and abused his mother, who had him taken before Judge True, when he was put under bonds to keep the peace. He was also fined for drunken and disorderly conduct. — Ira D. Sturges has arrived home from his business trip to England. — The work of building the sewer in the Mansion House will be going forward. It is a substantial piece of work. — Capt. Young has been named as assistant to the State Librarian for several years, is about to resign. The Captain will come into possession of a snug little fortune when the General leaves is distributed, and the inexcusable delay has been a great deal to him. — Hon. Eugene Hale passed through this city on Wednesday evening, the 10th inst. He is accompanied by his wife and daughter. — Hon. J. J. French who has been spending a year abroad, reached home Saturday evening. — The Talisman of Erin is to exhibit at Granite Hall Friday evening. — John M. Burke in his specialty has no superior. — A committee of the several Masonic bodies in this city has been appointed to consider the subject of erecting a Masonic temple. The first meeting of the committee will be held at the residence of Mr. E. J. French, on Wednesday evening, the 11th inst. — R. L. Fogg, Esq., has been appointed Superintendent of Dix Island Grand Works. — Two breaks occurred in the main pipe of the Augusta Water Co., Wednesday evening. — James Savage is expected to have the contract for completing the Bucksport and Bangor Railroad. — There was almost a fire in Savage & Dauborn's barber shop on Water St. Wednesday evening, caused by smoking a cigarette lamp. — Two more houses with carriages attached ran through the Kennebec bridge Wednesday, minus drivers. — The mercury rose to 88 in the shade, Wednesday. — There were ten deaths in the city during the month of June.

CITY AFFAIRS. A special meeting of the City Council was held Thursday afternoon. The petition of C. H. Weeks & Co., for compensation for alleged injuries received in consequence of an alleged defect in the sidewalk, was referred to the Committee on Highways, etc., and the Street Commissioner for the Western district.

An order was passed allowing a discount of 8 per cent. on all bills paid before Aug. 1st, 9 per cent. on those paid between Aug. 1st and Sept. 1st, and 4 per cent. for those paid between Sept. 1st and Oct. 1st. All taxes unpaid on the 1st of Oct. are to be charged with lawful interest on and after that date.

The Street Commissioner was ordered as follows: To construct a new sidewalk in front of J. Parson's store; to construct a cross walk from the depot to the post-office building; to construct a cross walk from the sidewalk on Summer St. to the sidewalk on Chapel street.

The City Marshal was directed to erect a lamp post at the corner of State and Laurel streets.

Notwithstanding the unfavorable weather, a grandly successful and splendid race took place at Robinson's Park. There were several races which were well contested and the day was agreeably passed. In the race for \$100 Dr. Geo. E. Brickett's horse won the first money, Whitefield Maid second, and Cray June third. Time: 2:50-2:52-2:54-2:51-2:52-2:55. This was followed by the sweepstakes, purse \$200, open to all horses, bet 5 in 5. In this race were entered Daylight and White Stockings. — Race won by Daylight. Time: 2:58-2:54-2:59.

The Day's Doings at the reunion of the Biscoe family at the Biscoe homestead in Sumner, on the day of June 1st, is to be published in pamphlet form together with the family records of the descendants of Charles Biscoe, who moved from Bridgewater to Sumner in 1784. All persons connected with this family, either directly or by marriage, are requested to communicate with W. B. Lapham, Augusta, Me., who is entrusted with the preparation of the pamphlet. Mr. Diplo thinks the cause of the death of so many fine maples in this city may be due to the operations of this pestiferous insect.

We are informed that Mr. G. F. Reynolds of Sidney, that a new colony of cabbage plants has appeared this summer, in the shape of a white maggot, which in some gardens has proved very destructive. He says a decoction of thoroughwort and smart weed will destroy them without injury to the plants.

The College Boards at Brunswick have decided to make military drill in Bowdoin College optional with the students. At the commencement of each year, students are to choose between the drill and gymnasium. Military tactics are to be studied the same as heretofore.

There has been a change in the running time of the Steamer Magnet. She will leave Augusta for Squirrel Island, on Saturdays and Mondays at 9 o'clock, P. M., and on Wednesdays and Fridays, at 6:30 A. M., unless further notice.

We learn that T. H. Hubbard, Esq., who has been reported dead last week, is improving with a fair prospect of getting out again. He will find his obituary notices very interesting reading during his convalescence.

We have received the first number of the Dringo Rattle, a paper just started in Bangor, published by D. M. Hall and edited by J. W. Lang.

Mr. Nathan Handy, of Wayne, had his right hand nearly severed by a circular saw in a short time since. — An influenza is prevailing among children in Winslow, accompanied by a severe cough, which in some cases requires the attendance of a physician. — Rev. Mr. Jenkins, a recent graduate of Bangor Theological Seminary, and pastor elect of the Congregational Church in Winslow, commenced his labors on the 5th. — John Osgood, Esq., formerly the well known proprietor of the Maine Central line, died in Gardiner, on Sunday last, at the age of 53 years. — Conductor Barr has completed twenty-five years of service on the Maine Central line. During all this time he has never met with an accident that caused injury to any person on his train, nor received a severe blow. — Hon. John Berry of Gardiner, will visit Kansas in August, where he has two sons. — William Burgess, aged 35, formerly a Lewiston policeman, committed suicide at the house of his father-in-law, in Sidney, last Wednesday, by shooting himself through the heart with a shot gun. He was a consumptive and despondent. — The house of Frank Love, Jr., of Clinton, was struck by lightning Monday night, and two persons were badly damaged, nor any one injured, although a number were in the house at the time. — Five ladies will enter the next class at Colby University. — A freeman had his jaw broken by the brake of a stage wagon while playing for the prize at Waterville, Saturday.

An exchange says: A sad illustration of the dire results of taking strong drink was brought to light at Dexter on the evening of the 21st inst. The wife of a man living in Lewiston had recently sought refuge from the drunken violence of her husband by fleeing to her friends at this place bringing with her three little children. For two months she had been in the hospital, and on Sunday evening the husband made his appearance on the late train. Meeting with one of the little boys and learning of his wife's being at church he proceeded thither, but hearing of his approach she escaped through the vestry window and to the residence of some of her friends. The man baffled in his design upon his wife, took departure on next morning's train. This man was some time in imprisonment for such indications of violence as knocking down his married daughter, and the exasperation that strong drink produces in him is such as to greatly endanger the lives of the entire family. The lady and boys will remain with her friends at Dexter.

ATTENTIVE MURDER AND SUICIDE AT OXFORD. Succeeding the fire at Oldtown Thursday, occurred a tragedy which resulted in suicide and high murder. It seems that Timothy Traflet, whose wife worked at the burning hotel against his will, was suspected of the deed. Meeting him on the street his wife accused him of it, when he immediately drew a revolver and shot at her heart, though owing to a sudden movement on her part, the ball entered her arm, producing no very serious result. On seeing the affair, officers and citizens immediately gave chase, and after a long run Traflet was cornered, and as the officers were closing upon him he took the revolver with which he shot his wife from his pocket, and holding it to his neck, fired. The ball passed through his neck inflicting a mortal wound. Traflet and his wife had not been on good terms for some time, and he has frequently threatened her with vengeance. He belongs in Bradley.

INDEPENDENCE DAY. The anniversary of our National Independence was not specially noticed in the larger cities of the State. In Portland, Bangor and Augusta the day was very quietly passed, and in Lewiston, Gardiner and several other places the programme only included a horse race.

Editor's Table.

SANITARIAN. The July number of the Sanitarian is received. Among the more important articles are "Waste of Life," "Air for Babies," "Typhoid Fever and Sanitary Administration," "Reports of Medical Societies," &c. This is a valuable health Journal and should find a place in every household. It treats of disease and its causes in a common sense practical way and points out the preventions and remedies. Published by A. S. Barnes & Co., New York.

INTERNATIONAL REVIEW. The number of this excellent magazine for July and August is at hand, and presents the following table of contents: "Wm. Cullen Bryant and his Writings," "Coal and its Supply," "Thirty Years of Freedom in Italy," "The Catholic Reformation in Switzerland," "The New Version of the English Bible," "The Orthodox Church," Published by A. S. Barnes & Co., New York.

The unusual amount of rainfall which we have had since June came in, has interfered with the usual picnic season, but we may now reasonably hope that the weather will be in order. We believe in picnics, and if it could become more frequent and general it would be all the better. They afford a pleasant escape for one day at a time, at least, from the care and turmoil of business and from the dust and heat of the city. With the usual reduction of fare on such occasions, it also affords an opportunity for people in reduced circumstances to spend a day's pleasure.

The most enjoyable picnics are not the larger ones, where the cars or steamers are over-crowded, but they are those where a few families unite together and go off into the country or out upon some island for a day's excursion. The escape from business cares, even for a single day, will often give strength for weeks of toiling and toiling. In that state of health, the system of birth, marriages and deaths, which has given the most valuable body of vital statistics that can be found in this country; a sanitary State of health was made in 1849, and a State Board of Health was established in 1869, which is regarded as the most important step taken in sanitary legislation. Its five reports are "an honor to the profession, and a credit to the community," as Dr. Allen Jones of Lowell, said that the prevention branch of medicine was only about thirty years old, and added that in that short space of time such had been done.
